## Packing Machine Feature

1. The packaging machine can complete the process of filling, measuring, sealing, cutting, printing, and output products automatically.
2. Chinese and English display, only need to set the parameters on screen (filling, bag length, etc.)
3. The system has a high degree of accuracy and can change the bag length by adjusting the parameters (the width of the bag and the bag former are one to one, so a machine can only use a kind of width of the roll film), and obtaining the complete trademark pattern by high-precision photoelectric control.
4. The whole machine frame is made of stainless steel, and the surface is finished machining, smooth, easy to clean, and disinfection management.
5. Modular design of relevant parts, easy to disassemble, assembly, stable operation, and convenient maintenance.

## Technical parameter

Items	Automatic Paste liquid packaging machine Honey ketchup sauce filling machine
Packing speed	13-20bags/ min
Bag size	(L)10-150mm (W)40-100mm
Bag seal mode	3 side seal back seal
Measuring range	10-200ml
Packing material	composite film, aluminum film, color film
Main power/voltage	500W 110V/220 V 50-60 Hz
Overall size	(L)1100x(W)550x(H)1670 mm
The weight	100 kg

## Machine Details

Main control panel,  
simple and intelligent operation

Air TAC cylinder: high precision, anti-rust, stable quality, more durable, accurate calculation.

A piston filling system  
Removable filling head  
for easy machine cleaning, stainless steel , prevent odor.

304 stainless steel hopper have large capacity, high strength, effectively prevent corrosion, wear, beautiful, hygienic.

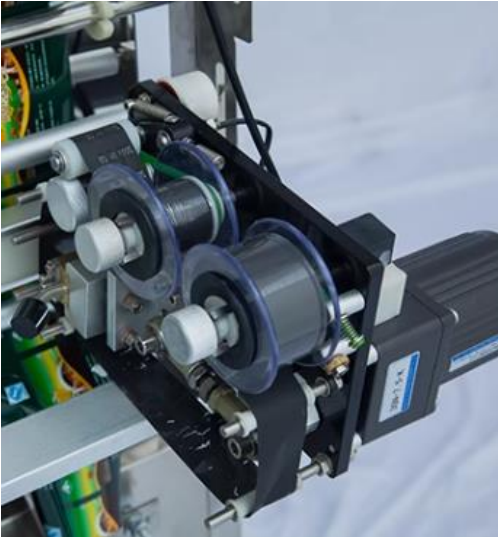

Stirrer  
High-power agitator, stirring speed is faster, more uniform, and more stable.

Universal wheel  
Easy to move to different positions,  
easy to carry.

## Option

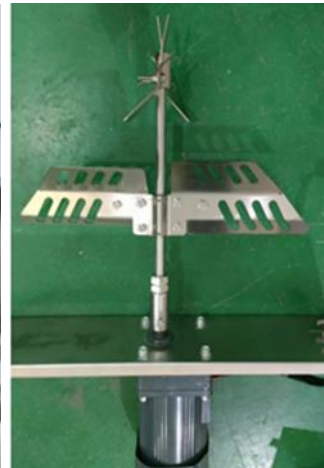

Date code: automatically print date, production lot number

Photocell: Position the color bag to allow the machine to make a complete pattern

Heating stirring device:

# GUANGZHOU WORLDE PACKAGING MACHINERY CO.,LTD
